*Building
Your Success*

Thompson Turner Construction provides construction services to help clients meet their objectives in variety of commercial, governmental and educational endeavors.

We are a full-service contractor with proven experience in helping our clients maximize their organizational and bottom-line success through fully optimized facilities. Whether it's new construction or the renovation of an existing facility or a pre-engineered building, our team of professionals can deliver the kind of results needed to ensure a successful outcome.

Diverse markets, diverse solutions

Every day, companies and organizations vital to our way of life depend on facilities to help them achieve corporate success and carry out organizational missions. At Thompson Turner, we've worked alongside these partners, helping them realize their dreams while ensuring practical success. We're proud to have a history of delivering building solutions to clients in important markets like these:

Education / Commercial / Municipal / Industrial

Delivery models that work for you

Our business is about your business. Which means it's incumbent upon us to offer the exact construction delivery model that best meets your operational objectives, whether your project is a school, retail or service business, hospital, parking garage, public facility, or any other facility.

We offer a diverse portfolio of delivery options, with demonstrated success in every one. It's all about listening carefully to understand your needs, then working together to identify the solution that will deliver your construction project on time, on budget, and in full accordance with your preferred approach to project management. In the end, your building project will proceed in a straightforward manner with the least possible impact on your operations.

Sustainable construction practices

Thompson Turner is an advocate for environmentally responsible, sustainable construction practices. Several of our project managers and superintendents are LEED accredited and many of our recent projects have been certified LEED Silver. Sustainable construction practices are utilized in our planning because it is the right thing to do.

Putting safety first

At Thompson Turner, safety is not a preferred option: it's core to our business, and it positively impacts human, environmental and financial concerns. We have been recognized by regulatory agencies for meeting and exceeding industry training and safety standards in every level of project. As we uphold these standards, we continue to prove that we can operate within safety and environmental regulations and remain cost efficient. Our commitment to safety has enabled us to grow by doing the right thing.

Proven partners

Making the decision to select a construction partner for your capital project is not without risk. Thompson Turner is known for its ability to listen to customers, then respond with construction solutions that deliver a high level of quality, safety, cost-efficiency and productivity. We use and offer the most advanced technology to power the process, including bidding and estimating, project management and scheduling systems. What sets us apart, however, are the human factors of personal accountability and integrity.

Building success is about building trust. It's here at Thompson Turner.

We have proven experience and positive client outcomes in these delivery models:

- *Integrated Project Delivery*
- *Design/Build*
- *Negotiated Scope*
